Location: Vacaville, California, United States

Senior Programmer with over a decade of experience in game development, VR/AR solutions, and web platforms. Expert in Unity, Unreal Engine, and cross-platform optimizations. Proven ability to lead technical teams, design efficient pipelines, and deliver scalable solutions for indie studios and global clients.

## SKILLS

- Programming: C#, C++, JavaScript, PHP, SQL, Zig
- Engines & Platforms: Unity, Unreal Engine, VR/AR, Android, iOS
- Tools & Tech: Blender, Substance Painter, Photoshop, AWS, Git, WebSocket
- Specialties: Technical Art, Shader Development, Pipeline Optimization, Tooling, Asset Optimization

## EXPERIENCE

### Freelance/Contract Developer, Remote

2023–Present

- Delivered custom Unity and Unreal Engine solutions, full-stack web apps, and asset pipelines for clients.
- Supported startups and enterprise-level teams with scalable game systems and optimized codebases.
- Produced 2D/3D assets and handled asset integration.

Periods of freelance work aligned with contract opportunities and market conditions, while maintaining consistent technical growth.

### Akupara Games, CA USA - Senior Programmer

Sep 2022 – Dec 2023

- Helped lead prototyping VR experiences optimized for mobile hardware.
- Built custom internal tools that streamlined workflows and supported design and QA teams.
- Developed and maintained game codebases, ensuring scalable and stable builds.
- Managed version control and automated deployment processes for multi-platform releases.

---

Role concluded after Meta scaled back funding for the commissioned project.

### **Vinci Games, CA USA** - *Lead Developer*

Jan 2020 – Dec 2022

- Directed prototyping and full development of VR experiences optimized for mobile hardware.
- Built and managed CI/CD pipelines for stable version delivery. • Coordinated asset optimization and QA to meet platform performance requirements.
- Oversaw technical documentation and onboarding for developers and artists.

### **Vitei Backroom Kyoto Japan** - *Technical Artist*

Dec 2017 – Jan 2019

- Viz-dev for Universal Studios Japan's Lupin VR Coaster project.
- Specialized in Look-Dev, FX, and simulation, enhancing production pipelines.
- Developed editor tools that improved workflow efficiency for artists and designers.

Position ended after the Lupin project was completed and the studio downsized following the loss of a major follow-up contract.

### **KyotoVR , Kyoto Japan**- *Lead Programmer*

Sep 2016 – Nov 2017

- Created and managed custom Unity editor tools that accelerated iteration and testing cycles.
- Collaborated with the asset production and procurement team to improve real-time rendering and visual fidelity of 3D scans.

Project work concluded as contracts naturally ended with client deliverables.

### **Zeami, Osaka Japan** - *Web App Dev*

Sep 2014 - Nov 2016

- Web app development for product display and purchase as well
- Kiosk app development.

### **Freelance/Contract Developer, Remote** -

2010–2014

- Delivered custom Unity and Unreal Engine solutions, full-stack web apps, and asset pipelines for clients.

- 
- Supported startups and enterprise-level teams with scalable game systems and optimized codebases.
  - Produced 2D/3D assets and handled integration for interactive experiences.
  - Periods of freelance work aligned with contract opportunities and market conditions, while maintaining consistent technical growth.
